

Just wanted to let the FCC know how much having the radio station K-LOVE has meant to me and my family. The inspirational music and support our family receives from this station cannot be found in any other radio station. Even my teenage children love to listen to this station. I know they would be very disappointed to learn that it was no longer available for them to listen to. K-LOVE has had a positive effect on our community by providing support to listeners, and others in need, in the community. This is the only radio station I will listen to in my car(until we are out of range in our car. Which I wish never happened). Please consider carefully before pulling K-LOVE by introducing Low Power FM.

Thanks

Cathy Groschup
